

New Tableau Server Login Process

Use myUK to access Tableau Server reports going forward

Tableau Server access has changed. To open Tableau Server reports, first log in to myUK, then use the Tableau link in the Launchpad section on the myUK landing page.

Important: Previously saved, bookmarked, or shared Tableau Server report links may no longer work. Start from myUK each time, then navigate to the report you need after Tableau Server opens.

1

Log in to myUK

2

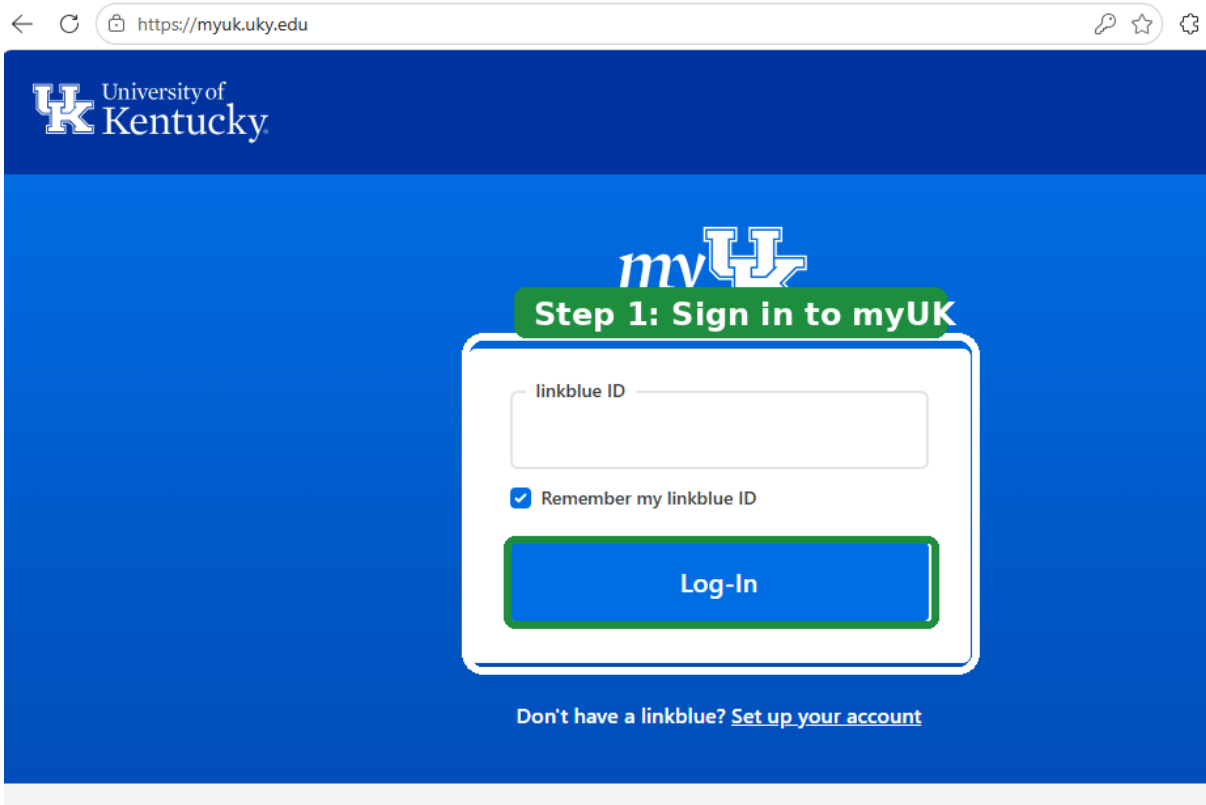

Scroll to Launchpad

3

Click Tableau

Step 1: Log in to myUK

Go to myuk.uky.edu and sign in with your linkblue ID. If your browser prompts for additional university authentication, complete that sign-in process as usual.

Step 2: Open Tableau from Launchpad

After the myUK landing page loads, scroll down to the Launchpad section near the bottom of the page. Select **Tableau** to open Tableau Server. The Tableau link may open in the same browser tab or a new window, depending on browser settings.

Helpful reminders

Old links may break	Direct report links, saved bookmarks, or links copied from previous emails may not work consistently. Replace old bookmarks with the myUK landing page.
Stuck in a login loop?	If Tableau Server repeatedly redirects you back to the login page, try clearing your web browser's cache and then start again from the myUK Launchpad.
Find your report	After Tableau Server opens, use Tableau Server navigation, search, favorites, or project folders to open the report you need.
Still having trouble?	Try opening myUK in a fresh browser tab. If the report still does not open, contact your usual Tableau/report support contact with the report name, URL of the report, and a screenshot of the error message.
